London, UK | +44 -7861334510 | ssen01011990@gmail.com | [linkedin.com/in/sanjay-ksen](https://www.linkedin.com/in/sanjay-ksen) | sanjaysen01011990.github.io

PROFESSIONAL SUMMARY

Data Analyst with 13+ years of experience turning complex data into actionable business insight across pharmaceutical, aviation, and government sectors. Hands-on working knowledge of Python for data analysis, scripting, and automation, combined with deep, practical experience in Power BI (data modelling, DAX, Power Query M) and Azure Databricks for building and maintaining scalable data pipelines. Skilled in advanced SQL, dashboard and KPI design, and translating business requirements into clear, reliable analytics. Proven track record automating reporting pipelines, improving data quality, and enabling self-service analytics at scale within Agile delivery environments.

PROFESSIONAL EXPERIENCE

BI Technical Lead (Business Intelligence & Analytics)

Tata Consultancy Services, London, UK | Dec 2012 – Present

GlaxoSmithKline (GSK) | Jun 2020 – Present

- Owned end-to-end BI delivery spanning Tibco Spotfire and Power BI, designing enterprise-scale dashboards and semantic models supporting strategic and operational decision-making across global functions.
- Architected and maintained scalable Spotfire analytics environments including data connections, visualization frameworks, and information links aligned with enterprise data standards.
- Built and optimized high-performance Power BI datasets using advanced DAX and star/snowflake modelling techniques, improving report responsiveness and reducing refresh times by up to 40%.
- Defined and enforced BI governance standards across both Spotfire and Power BI platforms, including workspace design, dataset reuse, RLS, documentation, and certified content, reducing duplicate reporting and improving data trust.
- Designed and automated reporting pipelines using Python, Azure Databricks, and SQL, ensuring reliable, scalable data refresh for global user bases.
- Collaborated closely with data engineering teams to align BI semantic models with upstream architecture and ensure consistency across the analytics layer.
- Championed self-service analytics through certified datasets, shared semantic models, and structured enablement sessions, reducing dependency on central BI teams.
- Delivered BI best-practice workshops covering Spotfire and Power BI, driving adoption and improving analytical capability across business functions.

- Worked within Agile delivery frameworks, contributing to sprint planning, backlog refinement, and stakeholder demos.

JetBlue Airlines | Sep 2017 – Jun 2020

- Delivered executive-level Spotfire and Power BI dashboards combining multiple operational and performance data sources to support leadership decision-making.
- Automated ETL and data refresh workflows using Python and Databricks, improving data availability and reducing reporting latency by 30%.
- Built forecasting and trend analysis models to support operational planning and performance monitoring across airline operations.
- Partnered with cross-functional teams to ensure data quality, scalability, and alignment with business priorities.
- Supported Agile delivery cycles using Jira and Confluence.

IWDMS – Government of Gujarat | Feb 2015 – Aug 2017

- Led the design and delivery of customized BI dashboards, increasing analytics adoption by 25% across government departments.
- Developed real-time KPI monitoring solutions to support operational oversight and performance management.
- Facilitated stakeholder workshops and user training to improve data literacy and self-service analytics capability.

CCTNS – Goa | May 2013 – Jan 2015

- Spearheaded cross-functional BI development for a large-scale government analytics program.
- Managed enhancements and production support for business-critical reporting solutions.
- Promoted from Associate Engineer to Project Lead within 18 months for strong delivery ownership and leadership.

EDUCATION

Bachelor of Engineering (B.E.) - Electronics and Communication Engineering

Rajiv Gandhi Technical University, India | 2008 – 2012

CORE SKILLS

Power BI, Python & Analytics

- Power BI Service (workspaces, datasets, deployment pipelines)
- Python for data analysis, scripting & automation (Pandas)
- Enterprise semantic models & shared datasets
- Advanced DAX, Power Query (M)
- Power BI performance optimization (model design, DAX efficiency, refresh tuning)
- Row-Level Security (RLS), dataset certification
- Dashboard & KPI framework design
- Tibco Spotfire

Data Engineering & Platforms

- Advanced SQL
- Data modelling (star / snowflake schemas)
- ETL / ELT pipeline automation
- Azure Databricks (notebooks, PySpark), Azure Data Factory
- GCP BigQuery
- Cloud data warehousing

Delivery & Ways of Working

- BI architecture & governance
- Self-service analytics enablement
- Stakeholder engagement & requirements translation
- Agile / Scrum delivery using **Jira and Confluence**
- Coaching, training, and best-practice adoption

CERTIFICATIONS

- Microsoft Power BI Data Analyst (Feb 2025)
- Databricks Certified Data Engineer Associate (Jul 2025)
- Databricks Fundamentals (May 2025)
- Professional Scrum Master (PSM-1) (Jun 2023)
- Tibco Certified Spotfire Professional & Associate (Jun 2021)
- Salesforce Admin & App Builder (Jul 2023)
- Associate Cloud Engineer Certification Google Cloud (Aug 2026)
- Claude Certified Developer - Foundations (Sep 2026)
